Nick:

I made some comments (minor ones).

Also, I wanted to make sure that I understood that you would be considering grids that ADEQ grab samples show hot as hot grids. In addition, you should not consider grids that ADEQ grab samples show clean as clean grids.

Gary

The QASP is attached. I didn't attach all the attachments that go along with it, just the more important ones. The Sampling Schedule is a spreadsheet breaking which depth to collect samples at from each cell. This is based on filling in the data gaps we discussed. Let me know if you have any questions on it. We can always add more samples if needed.

The QASP will be uploaded to TeamLink today, but I'll forward you a copy of everything. I'm at the COOP right now. Going to load the LRV with the DataRAMs and some other supplies.

Sent from my Verizon, Samsung Galaxy smartphone

Subject: Sampling Plan and ready to go?

Are we ready to go for Sunday? Can you send me the draft plan and maps? Also, the additional funds for the TDD were sent this morning so we are good on funds to complete the scope. Also, make sure you have reached out to the resident to let him know we are coming.
